

Thursday April 4th

Alan

What you did: Created Junit tests and Profile Page for Sprint 2 with ability to upload Photos to Firebase Database.

Obstacles: Mocking variables from the Firebase database.

What are you going to do?: Work on incorporating the group feature for the app.

Donald

What you did: Worked on presentation

Obstacles:

What are you going to do?: A lo

Logan

What you did: Demo the app. Finished Junit tests. Added user photo to profile page.

Obstacles: Connecting users.

What are you going to do?: look into connecting authenticated users.

Ryan

What you did: Worked on the presentation, wrote sprint retrospective, contributed to a couple of slides

Obstacles: Minimal, finding a time/place that worked for everyone

What are you going to do?: Plan for sprint 3

Notes:

Sunday April 7th

Alan

What you did: Corrected two issues posted on Github with users attempting to choose a Preference on the SUI or Homepage when not logged in and crashing the app.

Obstacles: Other homework.

What are you going to do?: Continue to debug and work on other issues like chat feature

Donald

What you did: Got a mobile device to properly run the app, and looked for any issues

Obstacles: Busy weekend

What are you going to do?: Note and fix errors.

Logan

What you did: I fixed some of the issues that were posted on the github repo.

Obstacles: Fixing a minor bug for new users

What are you going to do?: Look into adding friends feature.

Ryan

What you did: Added a tab layout to the social page, looked into a chat functionality

Obstacles: Figuring out how tab layouts works, figuring out which particular implementation is best for us

What are you going to do?: Implement the beginning parts of a chat functionality

Notes:

Thursday April 11th

Alan

What you did: Corrected a few layout issues and bugs regarding user functionality.

Obstacles: Other homework and implementing routes.

What are you going to do?: Continue to debug and work on other issues like routes.

Donald

What you did: Results now return the restaurant rating and phone number

Obstacles: Returning the right information for the right address

What are you going to do?: Create a better view for restaurant information

Logan

What you did: I tested some of the new changes.

Obstacles: connecting user moods

What are you going to do?: Look into adding events for groups of users

Ryan

What you did:

- Refactored database to have users listed by their emails
- Created a contact list
 - 2nd Tab on Tab layout
 - Users can add other users by email
 - Error checking to make sure user exists
- Layout prototype for chat finished

Obstacles: Modifying tutorial to mold with our particular needs, refactor of DB possibly affected other aspects of the app's performance

What are you going to do?: Finish implementation of chat feature, look into errors currently existing in the app.

Notes:

Tuesday April 16th

Alan

What you did: Created several animations and transitions from page to page, including a login animation and loading animation for the SpiceItUp page.

Obstacles: Time preparing for a job interview.

What are you going to do?: Continue to “spice up” the UI and implement various other features.

Donald

What you did: Rating Bar on results, and circular profile picture, also populate edit info text views for first name, last name, and phone number

Obstacles: Changing around views for the restaurant information.

What are you going to do?:

Logan

What you did: I have been testing new features, I have been finishing another project and will continue progress on app tomorrow.

Obstacles: Connecting users moods

What are you going to do?: work with ryan to expand event class

Ryan

What you did: Added group chat functionality

Obstacles: Finding the time to go through the chat functionality, modifying code to make 1-1 chats work for us, creating implementation of group chats

What are you going to do?: Study for other classes, find time to work with Logan on events, if have extra time, add some QOL features to chats

Notes:

Thursday April 18th

Alan

What you did: Worked on UI by removing cardviews from SpiceltUp page.

Obstacles: Was out of town for a job interview.

What are you going to do?: Continue to work on the UI and events, as well as routes.

Donald

What you did: Got edit user info to auto-populate data when opened.

Obstacles: A final test for another class.

What are you going to do?: Fix bugs improve results, clean up profile page

Logan

What you did: Finished other courses work, this app will be my main priority.

Obstacles: Connecting user moods.

What are you going to do?: Start events for groups of users.

Ryan

What you did: Nothing

Obstacles: N/A

What are you going to do?: Work with Logan on Events/Try and add more features to chats

Notes:

Tuesday April 22nd

Alan

What you did: Updated the UI, worked on debugging, and closed several issues.

Obstacles: N/A

What are you going to do?: Complete Junit tests and finalize the website.

Donald

What you did: Worked on displaying proper email in profile page, and creating a clear preference button, then exploring other ways to implement a default mood.

Obstacles: Getting a default mood into the choose preference view, getting user profile photo into the contacts view

What are you going to do?: Junit Tests and Presentation and Video

Logan

What you did: Fixed issues with pics on contacts and messages. Added events to app

Obstacles: Add mood glitch and create event glitch.

What are you going to do?: Fix the above two issues.

Ryan

What you did: Worked with Logan on events

Obstacles: Usual grind of figuring out how to do it, implementing, then debugging

What are you going to do?: Finish the app

Notes:
