

Spice App

Alan Manning, Donald
Lochbiler, Logan
Dawkins, Ryan
Simpson

Our App

- Chooses where to eat for you
- Based on Preferences
- Random Selection as well
- Meet with friends for a meal through app

Sprint Goals

- Create basic Skeleton of the app
- Ability to navigate between pages
- Become familiar with API for locations and restaurants
- Create functionality for Spice It Up option

Sprint Backlog

Goal	Estimated Time	Priority
Login Page	5	2
Home Page	2.5	1
Profile Page	4	1
Spice It Up	5	2

Navigation bar was created in addition to home page for navigation

Current Status

- Login and Logout functionality
- Spice It Up page with functionality
- Able to find and return random restaurant from given location.
- Skeleton Profile page
- Navigation across pages through navigation bar

Sprint 1 Retrospective

- The Good
 - Achieving the goals that we had set for sprint 1.
 - Having an API gather restaurants based on location.
- The Bad
 - The google places API
 - Distribution of work between members. Some members did a disproportionate amount of work compared to others.
- What to work on
 - Reuse of code
 - Working together for work instead of individual

Looking ahead

- Building a database
- Advanced Searches - Results page functionality
- Profile customization - Preset moods
- Social functions - Eat with friends
- Aesthetics

THANK YOU

GET READY FOR THE SPICE APP
